Supplementary Specification

Since I export the ***Report.pdf*** early than I saw the requirement in *Submission and Grading 1.8.6*,which stated that *State whether you solve the hazards at the beginning of your report*. But the original markdown file has been deleted, so I have to make a supplementary specification here on **how many testcases I have passed**.

I have pasted test cases 1,2,3,4,5,6,8, which means that **only test case 7 is failed**.
